

STEIN DOMES

The Stein Dome protects your bathroom from steam and mould, making your bathroom warmer and drier.

Stein Dome is an opaque acrylic dome that simply attaches to an existing shower cubicle to prevent steam from forming in the bathroom.

The benefits of having a Stein Dome are significant. Eliminate bathroom steam, have a warmer, drier bathroom and a healthier home.

No steam means a clear mirror, no condensation, no wet walls or ceilings and no mould or mildew. Stein Domes makes bathroom cleaning easier and you save money by turning off your extractor fan and heater. You can enjoy a warm, cosy shower and use less hot water.
