

## INFINITY TOILET

### CISTERN TO PAN CONNECTION

#### HOW TO ESTABLISH CORRECT ALIGNMENT AND SEAL SETTING:

1. Place the seal fully over the protruding cistern fitting (refer Diagram A).
2. Attach the pan nut assembly in the pan slots and tighten lightly (refer Diagram B).
3. Position the cistern in place. Push either nut assembly back or forward within the slots to ensure alignment with the pan. Finish tightening the pan nut assemblies.
4. Replace the cistern and fasten the stainless steel screw assemblies through the cistern base.

**NOTE: DO NOT USE SILICONE ON THE SEAL**
